

# Organization model

## 1. Organization model

A new SQLAlchemy model has been added to represent organizations in the system.

```
from sqlalchemy import Column, Integer, String, ForeignKey
from sqlalchemy.orm import relationship
from database import Base

#creating table structure or model
class Organization(Base):
    __tablename__ = "organization"

    id= Column(Integer, primary_key=True, index=True)
    name = Column(String, nullable=False)
    des= Column(String, nullable=False)
    owner_id = Column(Integer, ForeignKey("users.id"), nullable=False)
    # assigned_to = Column(Integer, ForeignKey("users.id"), nullable=True)

    owner = relationship("User", back_populates="owned_organizations",
foreign_keys=[owner_id])
    # assigned_user = relationship("User",
back_populates="assigned_organizations", foreign_keys=[assigned_to])
```

## 2. Schema Updates

Pydantic schemas have been defined to handle request/response validation for organization data.

- **`organizationin`**: Used for creating a new organization (input).

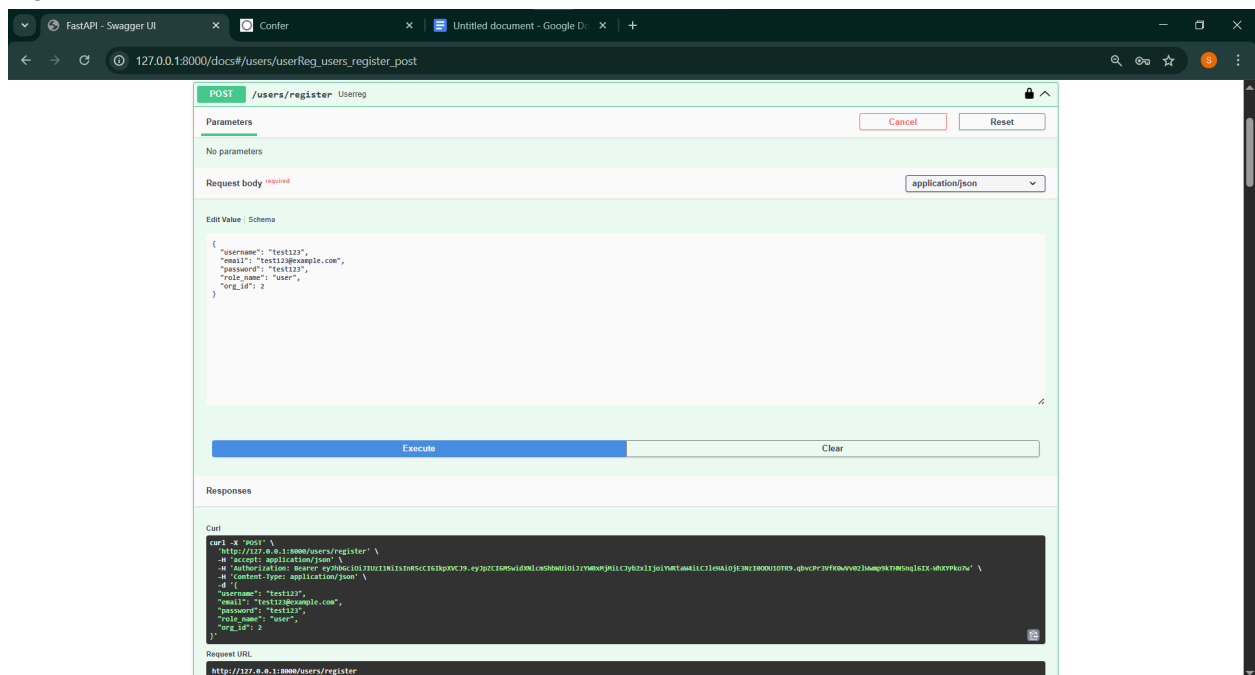

- **organizationDetails**: Used for returning organization data (output), including the owner.

```
class organizationDetails(BaseModel):
    id:int
    name:str=Field(...,min_length=3)
    des :str=Field(...,min_length=3)
    owner_id:int
    #assigned_to:int|None
class organizationin(BaseModel):
    # id:int
    name:str=Field(...,min_length=3)
    des :str=Field(...,min_length=3)
```

### 3. Updated User Router

**organization**— only can create organization,delete and read

**User**— only admin can create ,delete and view user and also while creating user assign org\_id

[illegible]

GET

/users/Show\_organization Show Organization

Parameters

Cancel

No parameters

Execute

Clear

**Curl** /users/show\_organization Show Organization

---

**Parameters**

No parameters

---

**Response**

```
curl -X "GET" \
    'http://127.0.0.1:3000/users/show_organization' \
    -H 'accept: application/json' \
    -H 'authorization: bearer eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.e30KLSYyZmEwLWVlcnQyMjBkZWkiLCJyb29tPSJpdC9ybzdiciJmcmFmc2kiLCJleSI6ImNldDdpcnR5eS5kaWZlcmljaW50cy5kb29keSBkdjBkZWkiLCJhdWQiOiJ1bnRpbGlzLThtbWphLnAi'`
```

**Request URL**

http://127.0.0.1:3000/users/show\_organization

**Server response**

| Code                                       | Description      |
|--------------------------------------------|------------------|
| 404<br><small>Unprocessable Entity</small> | Error: Not Found |

**Response body**

```
{
  "detail": "Not found"
}
```

**Response headers**

```
content-length: 23
content-type: application/json
date: Mon, 02 Mar 2020 10:11:28 GMT
server: nodecore
```

---

**Responses**

| Code | Description         | Links    |
|------|---------------------|----------|
| 200  | Successful Response | No links |

Media type: application/json

Controls accept header:

Example Value | Schema

```
{
  "id": 0,
  "name": "string",
  "sex": "string",
  "gender_id": 0
}
```

---

**Delete** /users/delete\_organization Delete Organization
