

Sameen Shahzad

Software Developer with a Bachelor's in Information Technology from PUCIT. Strong foundation in OOP, data structures, algorithms, and software engineering principles. Hands-on experience building REST APIs using FastAPI, Java, SQL, PostgreSQL, and modular architecture, with exposure to enterprise and FinTech environments. Familiar with backend development, database management, and collaborative workflows. A quick learner committed to clean, maintainable code and growing in backend and AI-driven system development.

WORK EXPERIENCE

i2c - Associate Software Engineer - Product Operations July 9, 2025 - Oct13, 2025

Worked in the FinTech domain, gaining exposure to enterprise-level products and workflows. Collaborated with cross-functional teams to support high-quality software delivery. Developed an understanding of software operations, product lifecycles, and industry best practices.

Stewart - Development Intern May 1, 2025 - Jun 10, 2025

Gained hands-on experience in software development within a professional environment. Worked with development teams to understand application workflows and coding standards. Improved understanding of OOP concepts, debugging, and collaborative development.

EDUCATION

University of Punjab-PUCIT

Bachelor of IT – 3.63

Kips College

Pre-engineering – 98%

PROJECTS

HumCare (HAR) App – Final Year Project (Sep 2024 - June 2025)

Developed the HumCare app, a Human Activity Recognition (HAR) system that monitors and classifies real-time activities of elderly and paralyzed patients using sensor data from wearable devices. Integrated RabbitMQ as a message broker for seamless device communication.

Technologies: Java, Python, Android Studio, RabbitMQ, SQL, Eclipse

E-commerce Website for Clothing Shop 📄

Developed independently a full-stack e-commerce platform supporting product listings, shopping cart, inventory, and session management. Implemented role-based authentication for users and admins.

Technologies HTML, CSS, JavaScript, Java, JSP, MySQL

Damage Car Detection System (CNN-Based) 📄

Designed a computer vision-based model to classify vehicle damage using Convolutional Neural Networks (CNN). Trained on a diverse dataset to detect dents, scratches, and structural issues.

Technologies Python, TensorFlow, CNN

SKILLS

- **Programming:** Python, Java, C#, C++, JavaScript
- **Backend:** Java, .Net, FastAPI, REST APIs, JWT Authentication
- **Databases:** PostgreSQL, MySQL, Oracle, SQL Query
- **Concepts:** OOP, Data Structures, Algorithms, Software Design
- **Tools:** Git, GitHub, Eclipse, Android Studio, Linux (basic), Docker (basic)
- **Frontend:** HTML5, CSS, JavaScript, jQuery (basic)
- **Practices:** Agile collaboration, clean code, version control
- **Other Skills:** Responsive Web Design, 3D Animation, Content Writing, UX/UI
